## TECHNICAL PROJECTS

---

<b>Finish Line</b> (Object-Oriented Programming 2 Course Capstone Project)	Finish Line is a typing game developed as a capstone project to sharpen typing skills while reinforcing core concepts from the CIT-U Computer Science curriculum. Built using Java, JavaFX, MySQL (via JDBC), and CSS, with GitHub for version control and XAMPP for local server deployment.
<b>QuickCart</b> (Mobile Development Course Project)	QuickCart is a Kotlin-based Android app that streamlines grocery list creation and management. Designed for convenience and speed, it features an intuitive UI that helps users plan, organize, and shop efficiently—all in one place.
<b>AIO StuBu</b> (Object-Oriented Programming 1 Course Capstone Project)	All-In-One Study Buddy (StuBu) is an offline-first Windows desktop app designed to equip students with essential academic tools on one platform. Developed using Java and JavaFX, it focuses on productivity, accessibility, and modular utility for learners.
